

DSC-W620

Compact digital camera

Capture superb picture quality and HD video with ease. Its 14.1MP sensor, 5X optical zoom, and Sweep Panorama™ mode allow you to create breathtaking images, while 720p video records the action and sound, even when zooming. Make taking pictures more fun with Picture Effects, like toy camera and pop color.

Bullets

- Capture your videos in HD Movie mode (720p)¹
- Take stunning images in Sweep Panorama™ mode-up to 360°
- 14.1 megapixel plus a 2.7" LCD screen for easy viewing
- Picture Effect for more expressive photos
- iAuto mode automatically optimizes camera settings
- Face Detection and Smile Shutter™ technologies
- Face Priority and Red-eye Reduction functions
- Soft Skin mode reduces visible blemishes and wrinkles
- iSCN detects 8 scene conditions and adjusts camera settings
- DRO Standard and Plus recovers shadow detail in high contrast scenes

Features

720p AVI Movie Mode

In 720p AVI movie mode the camera shoots 1280 x 720 high definition movies at 30 fps, a standard format when working with a PC.¹ Users will create high quality movies with full use of optical zoom in files small enough to transfer to compatible PC or Mac® computer. Once transferred to your computer and connected to the internet, you can effortlessly upload your media to popular photo and video-sharing websites such as Photobucket® and YouTube™.

Sweep Panorama™ mode (up to 360°)

Reach beyond the traditional wide angle lens, and capture more breathtaking shots with Sweep Panorama™ mode. Simply press the shutter button and sweep the camera in the desired direction and the camera continuously shoots at a high speed, then seamlessly stitches the images together with automatic position adjustment to create one stunning panoramic image. Available in wide and up to 360° full circle, the camera can take a variety of panoramic shots. Now capturing wide landscapes is as easy as press and sweep.

14.1 Megapixel Super HAD™ CCD Image Sensor

A powerful 14.1 megapixel 1/2.3" Super HAD™ CCD image sensor helps you capture gorgeous images with superb contrast and clarity down to the finest detail. With 14.1 megapixels, you can create stunning, photo-quality prints up to A3+ (13x19") size, or crop your images and still come away with high resolution shots.

2.7" (230K dots) Clear Photo™ LCD display

Generous 2.7" (230K dots) Clear Photo™ LCD display features sharp, natural color that makes it easy to compose shots, read menus, and view photos, even in bright sunlight.

Intelligent Auto Mode

Unlike traditional auto mode, Intelligent Auto (iAuto) mode thinks for you, recognizing scenes, lighting conditions, faces, and adjusts settings resulting in clear images, faces with natural skin tone and less blur. Take advantage of all the technology without leaving Auto mode. Kids on the playground, landscape shots, a beautiful flower or an indoor birthday party; all result in clear images without leaving auto mode.

Face Detection technology

Face Detection technology detects up to eight individual faces and adjusts focus, exposure, and white balance to help deliver crisp, properly lit images of family and friends.

Smile Shutter™ technology

Smile Shutter™ technology captures a smile the moment it happens. Simply press the Smile Shutter™ button and the camera does the rest. You can also select adult and child priority and indicate the degree of Smile Detection sensitivity. Intelligent Scene Recognition can now be used together with Smile Shutter™ mode when the Intelligent Auto mode is on. This means that beautiful smiles can be captured with settings optimized for the particular scene, even in difficult conditions such as twilight and backlighting.

Soft Skin mode

Portrait subjects will love the results. Soft Skin mode recognizes skin tones and reduces the appearance of blemishes and wrinkles without affecting the rest of the shot.

Intelligent Scene Recognition (iSCN) Mode

Intelligent Scene Recognition (iSCN) Mode automatically detects seven different types of scenes and, within just 1/30th of a second, selects the appropriate camera settings: Backlight, Backlight Portrait, Twilight, Twilight Portrait, Twilight using a tripod, Portrait, Landscape and macro.

Dynamic Range Optimizer

Dynamic Range Optimizer (DRO) Standard and Plus uses a sophisticated algorithm to help recover shadows and highlights. The result is more natural images with clearer details that more closely match what your naked eye sees. DRO is particularly effective when shooting backlit portraits or any scene with a dramatic contrast between background and foreground lighting. DRO Plus allows for even greater optimization by analyzing each region of an image and performing additional image processing.

Picture Effect for more expressive photos

Picture Effect adds a new level of expression to photos, making ordinary landscapes and portraits come to life by heightening mood and emphasizing certain attributes.

Self-Portrait Timer

Self-Portrait Timer helps take the guesswork out of self portraits by utilizing Face Detection technology to recognize when your face enters the frame. Once the camera detects your face, it triggers a 2-second timer, and then snaps a picture.

Specifications

Camera	
Camera Type	Compact zoom digital camera
Imaging Sensor	
Imaging Sensor	1/2.3" Super HAD CCD Sensor
Pixel Gross	14.5MP
Effective Picture Resolution	14.1MP
Color Filter System	RGB primary color filters
Recording	

Media Type	optional "Memory Stick Duo" (No movie recording), optional "Memory Stick PRO Duo", optional "Memory Stick PRO-HG Duo", optional SD Memory Card (Class 4 or higher), optional SDHC Memory Card (Class 4 or higher), optional SDXC Memory Card (Class 4 or higher)
Still Image Mode	JPEG
Still Image Max Effective Resolution	Approx. 14.1 Megapixels
Still Image Size 16:9	11M(4,302 x 2,432) / 2M(1,920 x 1,080)
